Formation - Cybersecurity for O&G Professionals

CYBROGP-EN-P | **Présentiel** | **1 jour**

Cybersecurity is nowadays affecting every aspect of business. However, most O&G professionals do not have much IT experience. The course “Cybersecurity for O&G Professionals” aims at emphasizing the role of employees as first-line defenders of company information, and at recognizing most common attack tactics. The course will also give some keys to ensure protection of company computer at home and personal devices (e.g. mobile phones)

Niveau
Découverte

Public
Anyone who works with computers, regardless of previous IT experience

Objectifs
Attendees will be able to implement the following skills:

- Participants will be (more) aware of the important role that professionals play as a first-line defense against cyber attacks, and will be able to effectively defend themselves against possible attacks.

Pédagogie & ressources techniques
Virtual classroom ended by a business case

Évaluation des acquis

- Trainees are assessed throughout the training through practical application phases and interactions with the trainer
- A final on-the-spot evaluation may also be carried out at the end of the course and/or at the end of each module using tests designed to verify the learners’ understanding and assimilation of the knowledge linked to the training objectives

Prérequis
No prerequisites are necessary to follow this course

Responsable
IFP Training instructors, with expertise in the field and trained in modern teaching methods adapted to the specific needs of learners from the professional world
