

# Formation - Data Management and Data Science for E&P Operations

DMDAEP-EN-P

Préentiel

50 jours

Whatever the Oil & Gas discipline, data is now taking a more and more important role in all business decision processes. An efficient management of data is becoming crucial for E&P companies, as data volume is constantly increasing and reservoir optimization is key. Because of this high data volume, data analytics have progressively invaded the O&G industry and been applied to a wide range of E&P applications. The Data Management and Data Science for E&P Operations will provide a transverse understanding of how Data shall be managed and how it may be used to create value.

## Certificat IFP Training

Graduate Certificate

## Niveau

Découverte

## Public

Oil & Gas professionals who plan to take responsibilities in data management and be part of their company's digital transformation

## Objectifs

Attendees will be able to implement the following skills:

- Go through the main data types used in the E&P domain
