

Formation - E&P Project Control Tools

PCGB-EN-P

Présentiel

5 jours

This course provides a comprehensive understanding of the techniques used to control a project.

Niveau

Perfectionnement

Public

Professionals who have already occupied a position within a project task force and need to understand the fundamental project control processes.

Objectifs

Attendees will be able to implement the following skills:

- Specify scope and interfaces of the project control function
- Apply different methods and tools related to project control
- Identify areas of concern and propose a corrective action plan

Pédagogie & ressources techniques

- The course is illustrated by numerous examples taken from actual Exploration & Production projects
- A project case study is used stage-by-stage while constantly comparing the standpoints of the company and the contractor

Évaluation des acquis

- Trainees are assessed throughout the training through practical application phases and interactions with the trainer
- A final on-the-spot evaluation may also be carried out at the end of the course and/or at the end of each module using tests designed to verify the learners' understanding and assimilation of the knowledge linked to the training objectives

Prérequis

Provide evidence of a professional experience of at least 1 month, related to the concerned field.

Responsable

IFP Training instructors, with expertise in the field and trained in modern teaching methods adapted to the specific needs of learners from the professional world
